#### **PRECEPTING EXPERIENCE**

---

2018 - 2023	Drug Information, Preceptor (longitudinal) PGY-1 pharmacy residents Cape Fear Valley Health System - 20 residents in total -
2014 - Present	Drug Information Fourth-year student pharmacists Campbell University College of Pharmacy & Health Sciences - Over 300 student pharmacists in total
2014 - Present	Drug Information PGY-1 and PGY-2 pharmacy residents Community Pharmacy Residents, Harnett Health System Pharmacy Residents, Wilson Medical Center Pharmacy Residents, Cape Fear Valley Health System - Over 20 pharmacy residents in total

#### **INNOVATIONS IN TECHNOLOGY IMPLEMENTATION IN TEACHING**

---

2022	Skill Training & Simulation via Longitudinal eLearning (12 modules) - Utilized Analysis Design Develop Implement Evaluate (ADDIE) Framework to design effective training modules for student pharmacists. Employed instructional design models and theories (e.g., Gagne's 9 Events and Merrill's Principles of Instruction) in design process. Utilized Articulate Storyline and various media production tools to develop skill training opportunities for student pharmacists and collected results and survey feedback through Qualtrics to improve the experience.
------	--

- 2017      Order Verification Objective Structured Clinical Evaluation (OSCE)  
              - Created the format for 1) utilizing order verification to teach the most prescribed drugs and 2) an OSCE format that tests students' ability to appropriately check prescription orders. Developed a catalogue of 100 verification scenarios that are selected during the OSCEs.
- 2018      Educational Electronic Health Records  
              - Piloted and championed implementation of an electronic medical record (EHRGo) in skills courses throughout the curriculum in the first, second, and third professional year at Campbell University College of Pharmacy & Health Sciences (2017).  
              - Developed an educational electronic medical record to replace EHRGo (2023) with a specific focus on needs of the Doctor of Pharmacy Program via eLearning authoring software (Articulate Storyline).
- 2015      High Fidelity Simulators  
              - Monthly Interprofessional simulations with the Physician Assistant program and fourth-year student pharmacists during their drug information rotation at Campbell University College of Pharmacy & Health Sciences.
- 2015      Drug Information Database  
              - Developed a drug information database in Microsoft Access to maintain records of drug information queries and provide individual students with areas for improvement, edits to their responses, and other constructive feedback at Campbell University College of Pharmacy & Health Sciences.
- 2015      Drug Information Mobile Application  
              - Alongside a developer, I helped conceive a mobile application that allowed drug information requests to be sent from mobile devices to the Drug Information Center at Campbell University College of Pharmacy & Health Sciences.
